+34 611 85 03 96 | caiocvelasco@gmail.com | Brazilian and EU citizen

Data & Analytics Engineer with 6+ years building data platforms and analytics products, from ingestion and migrations to trusted data models and self-service analytics. Hands-on with **dbt, Snowflake, Databricks, Redshift, SQL, Python, AWS, CI/CD, and Looker** across aviation, sports, IoT, e-commerce, and insurance. **Strong communicator** experienced in **stakeholder management**, machine learning, and causal inference.

Mechanical & Aerospace Engineer with a Master in Economics & Public Policy from UCLA; awarded full scholarships from the Lemann and General Electric Foundations for academic excellence in Brazil and the USA.

PROFESSIONAL EXPERIENCE

GLOBAL INDEPENDENT CONSULTING

UK, USA, Brazil

Data Engineer & Analytics Engineer Roles - 100% Remote, B2B Contractor

January 2022 – June 2026

Zurich Insurance via NTT Data Europe & Latam (UK & Spain, Insurance)

- Migrated 100 legacy SAS data pipelines into dbt Core running on Databricks, fully integrated with Azure DevOps; optimized dbt models, implemented incremental logic, custom macros, and data quality checks.

Javvy Coffee & Urban Stems via Brainforge (USA, e-commerce)

- Implemented end-to-end solutions in BigQuery covering ingestion, star schema data modeling with dbt, and data quality across Shopify and Amazon API-based lineages across Customer Support, Sales, and Finance.
- Led a large-scale BI governance initiative, reducing 800 Looker dashboards to around 80 actively used assets by automating warehouse usage/dependency cross-validation with Python. Redshift and dbt were used.

IAG - International Airlines Group (UK, Aviation)

- Migrated 10 financial ETLs into modular dbt Core models on Snowflake, while supporting basic analytics engineering workflows during a maternity-cover contract. The data models are consumed by PowerBI.

FENG (Brazil, Sports / Football)

- Implemented a new Snowflake-dbt-DuckDB data architecture for payment data, migrating legacy Pentaho ETLs into modular ingestion and transformation pipelines using incremental strategies reducing processing time by 97% and lowering Snowflake infrastructure costs. Their data products are consumed by PowerBI.

Quext via Blue Orange Digital (USA, PropTech & Smart Home IoT)

- Led product and analytics engineering work for customizable reporting tools across IoT sensors, chatbot, financial, and property-management data, coordinating Data Engineers, Product Designers, and client stakeholders in supporting a unified data model development. Snowflake, dbt, and Tableau were used.

APPLIED DATA SCIENCE PROJECTS

FENG (Brazil, Sports / Football)

Brazil, Rio de Janeiro

Applied Data Scientist, Churn & Reactivation (Remote)

November 2025 – March 2026

- Built a reactivation propensity model for members of a football club loyalty program, ranking inactive members by return likelihood using engagement data; achieved approximately 0.94 AUC on a later holdout period and translated outputs into CRM metrics for targeted retention campaigns.

Royal Holloway University of London

UK, London

Applied Data Science, Econometrics & Causal Inference

November 2019 – April 2020

- Conducted econometric analysis in Python and R for a World Bank project on climate change and agricultural productivity in African countries, supporting regression-based analysis with Professor Juan Paulo Rud.

University of California Los Angeles

USA, Los Angeles

Applied Data Science, Econometrics & Causal Inference

September 2018 – June 2019

- Conducted econometric analysis in Python and R on the relationship between family planning and welfare access in the United States, supporting regression-based analysis with Professor Adriana Lleras-Muney.

PREVIOUS BUSINESS-ORIENTED ROLES IN BRAZIL

Brazil (2013 – 2017)

Stone Co, Credit Card Processor - Entrepreneur in Residence

- Stone is a Brazilian FinTech unicorn startup. I was its first employee, reporting directly to the founders. I designed the first draft of Stone's credit card reconciliation process.

MePrepara.com.br, a Mathematics Preparatory Online Course for GMAT and GRE - Founder

- Designed a fully automated math course to prepare low-income Brazilians for the mathematics part of GRE and GMAT exams, required at the most prestigious MBA and PhD programs worldwide.

EDUCATION

TILBURG UNIVERSITY

Tilburg, Netherlands

PhD in Economics (unfinished)

August 2020 – December 2021

- Top 5 European Economics Department. *(Due to family issues during COVID, I stopped and returned to Brazil)*
- Main topics: Advanced Mathematics and Statistics, Microeconomics, Causal Inference.

UNIVERSITY OF CALIFORNIA LOS ANGELES - UCLA

Los Angeles, USA

Master of Economics and Public Policy (Data Science track)

August 2017 – June 2019

- Top 15 university worldwide - *The Times Higher Education World University Rankings*.
- Main topics: Data Science, Multiple Regression Analysis, Causal Inference, Consumer Behavior.

FEDERAL UNIVERSITY OF RIO DE JANEIRO - UFRJ

Rio de Janeiro, Brazil

Bachelor of Science in Mechanical Engineering (5-year degree)

December 2012

- Top 8 Latin American university - *QS Latin America University Rankings 2023*.
- Graduated *cum laude*: Highest grade in the class of 2012 of 100+ students

AWARDS

- **Koopmans Scholarship. Tilburg University, Netherlands (2020)**: Awarded for academic excellence.
- **Lemann Foundation Scholarship. UCLA, USA (2017)**: Merit scholarship to students admitted to Harvard, Stanford, MIT, Columbia, UCLA or Oxford.
- **Global Pre-MBA Leadership Program, Yale University, USA (2013)**: Selected as one of 50 young leaders worldwide to explore MBA education; sponsored by Goldman Sachs.
- **The Club of Rome, Switzerland (2012)**: 60 young leaders selected for an international leadership initiative.
- **Mechanical Engineering, UFRJ (2012)**: Graduated *cum laude*, highest grade in the cohort.
- **Brazilian Government & US Department of Education (2011)**: Scholarship at North Carolina State University.
- **General Electric Scholar-Leader Program, Brazil (2010)**: Scholarship to top 10 Brazilian engineering students.

SKILLS

- **Data Engineering & Analytics**: SQL, Python, dbt, Snowflake, Redshift, Databricks, BigQuery, DuckDB
- **Data Science & Machine Learning**: Python (Pandas, Scikit-learn, statsmodel)
- **Experimentation & Causal Inference**: A/B test design (hypothesis testing), Difference-in-Differences (DiD)
- **BI & Data Visualization**: Metabase, Looker, Rill, PowerBI, Tableau
- **Data Integration**: Meltano, Fivetran, Stitch, Hevo, ETL/ELT pipelines
- **Infrastructure & DevOps**: AWS (S3, IAM), Docker (basic), Git, GitHub Actions (CI/CD)
- **Applied AI**: LLM systems (prompt design fundamentals, context injection, basic RAG)
- **Languages**: Portuguese (Native), English (Fluent), Spanish (Advanced)
